Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-25 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-25 rejected under 35 U.S.C. 103(a) as being unpatentable over Rivera et al. (2002/0107699).

As to claim 1, Rivera et al. discloses a system comprising an applications content mapping module (data manager) for automatically mapping electronic purchase requisition applications content of a first data format processed internally to a second data format; a database capable of storing data descriptors describing the contents of said purchase requisition applications, said database capable of storing data object and attributes pertinent to said electronic purchase requisition application content and applications content translation logic, translating applications content into a third format (claim 16). Not disclosed is utilizing tags of said first data format to determine corresponding data objects and selectively retrieving one or more of said corresponding data objects and attributes according to a flag. In the absence of any stated

Art Unit: 3644

problems solved by or any stated advantage obtained by utilizing tags of said first data format to determine corresponding data objects and selectively retrieving one or more of said corresponding data objects and attributes according to a flag as claimed in the instant invention; It would have been obvious to one of ordinary skill in the art at the time the invention was made to comprise the system of Rivera et al. to utilize tags of said first data format to determine corresponding data objects and selectively retrieving one or more of said corresponding data objects and attributes according to a flag. Further such modification is merely an alternate equivalent data format process means performing the same intended function.

As to claim 2, disclosed is an applications content configuration module coupled to said application content mapping module (detailed description).

As to claim 3, disclosed is an extensible module capable of including predefined data descriptors.

As to claim 4, disclosed is data formatting logic (paragraph [0047]).

As to claim 5, disclosed is pre defined tag information (product identifiers).

As to claim 6, disclosed is compliance with XML.

As to claim 7, disclosed is the mapping logic for automatically mapping index information of said first data format into said tag information of said second data format (detailed description).

Art Unit: 3644

As to claim 8, disclosed is the applications content configuration module is capable of being and executable text file.

As to claim 9, disclosed is the XML compliant with the OBI

As to claim 10, disclosed is the client capable of being a wireless personal computer system.

As to claim 11, disclosed is a sever coupled to said XML content mapper; a plurality of goods and services catalog residing in a database in said server, each of said catalogs comprising unique goods and services identification parameters; a XML content translator and a document exchange framework module coupled to said content mapper (Detailed Description).

As to claims 12-25, the system and method as disclosed in the instant application is considered to be anticipated as readily apparent by the teachings of Rivera et al.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

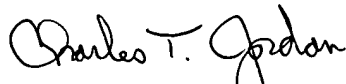

Art Unit: 3644

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
